SUMMARY

Backend-focused software engineer with 6 years of experience building and scaling distributed systems in fintech. Specializes in reducing infrastructure cost and latency without sacrificing reliability. Led two production migrations with zero downtime.

EXPERIENCE

Senior Software Engineer — Ledgerly Inc.

Jun 2022 - Present | Austin, TX

- Led migration of the payments service from a monolith to microservices, reducing p95 latency by 42% and cutting monthly infrastructure cost by \$120,000.
- Designed and shipped a real-time fraud-detection pipeline processing 3.2M transactions/day with 99.98% uptime.
- Mentored 4 junior engineers; 3 were promoted within 18 months under a structured growth plan I built.
- Reduced average CI/CD pipeline time from 26 minutes to 9 minutes by restructuring the test suite and enabling parallelized builds.

Software Engineer — Northbridge Analytics

Aug 2019 - May 2022 | Remote

- Built an internal reporting API adopted by 8 teams company-wide, replacing manual spreadsheet reporting and saving an estimated 15 hours/week across teams.
- Optimized core PostgreSQL queries, reducing average dashboard load time from 4.1s to 0.8s.
- Owned on-call rotation for a service with 99.95% SLA; authored the incident runbook still in use today.

Software Engineer Intern — Northbridge Analytics

May 2018 - Aug 2018 | Remote

- Built a Python ETL script that automated a previously manual weekly data-cleaning task, saving 6 hours/week.

SKILLS

Languages: Python, Go, TypeScript, SQL

Backend / Infra: FastAPI, Django, gRPC, Kafka, Docker, Kubernetes, AWS (EKS, RDS, S3)

Data: PostgreSQL, Redis, Elasticsearch

Practices: CI/CD, TDD, on-call incident response, system design

PROJECTS

- **openledger-cli** (github.com/snguyen-dev/openledger-cli) — open-source CLI for reconciling ledger exports; 340+ GitHub stars, 12 external contributors.

EDUCATION

B.S. in Computer Science — University of Texas at Austin, 2019
